

•SIX MONTHS TO OPERATIONAL • FACILITIES BASED CLEC • LOW COST • LOW RISK • WE GET PAID AFTER YOU •

SIMPLE

Who We Are

American CLEC is affiliated with Win.Net Internet. A successful ISP / CLEC in business for over 14 years. Our purpose is to help other ISP's become CLEC's so that they can take advantage of huge savings and new offerings.

Win.Net Internet operates a CLEC in two states, with three incumbent carriers, Central Office collocation, and OC-48 meet point.

- Eliminate your PRI's or T1's
- Eliminate most remote POP's
- Replace most Point-to-Point and Frame T1's to Customers
- Replace much of your T1/T3 infrastructure

LOW COST

Our Approach

We make it fun. We come to your place. We talk about your network: PRI's, POP's, T1's, etc. We talk specifics. We look at how what you have can be changed to save you thousands.

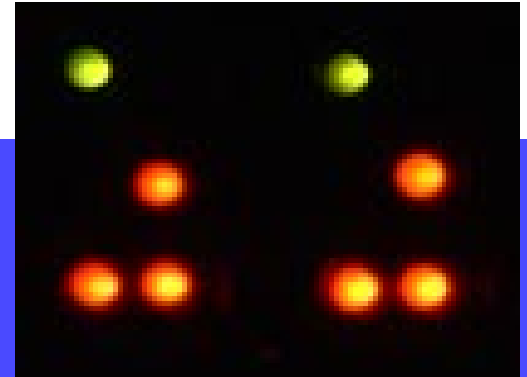

We prepare a detailed proposal for you: the transition costs, itemized savings, and fees (most of which are paid afterward from savings).

We want to give you a CLEC, not a headache. With your OK, we begin. We do the lion's share of the work.

- Incorporation
- Interconnection Agreements
- State PSC Application
- Tariff Filings
- Obtaining Phone Numbers
- CO Collocation
- Several Industry Codes
- Ordering Trunks & Circuits

We keep no secrets. When we are finished we document everything in an online database. We leave you with a fully operational CLEC that will save you thousands and thousands.

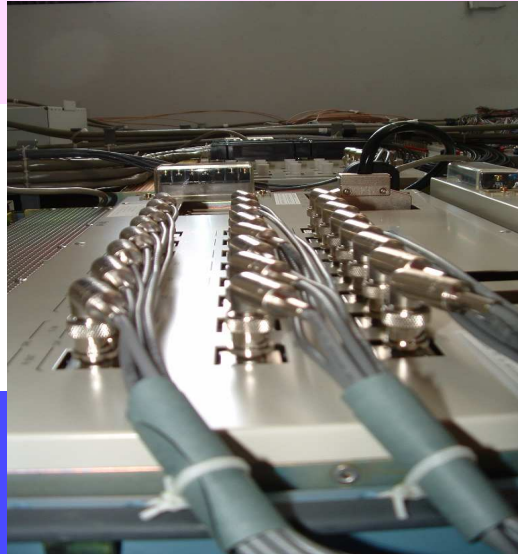

HIGH SAVINGS

**IN SIX MONTHS
WE DELIVER TO YOU A
FULLY OPERATIONAL
FACILITIES BASED CLEC**

**THOUSANDS OF DOLLARS
WILL BE SAVED BY
REVOLUTIONIZING THE
SIMPLICITY AND POWER
OF YOUR NETWORK**

**WE ARE PAID AFTERWARD
THE MAJORITY OF OUR
FEES COME FROM A
PORTION OF YOUR
SAVINGS FOR A LIMITED
TIME**

Our Unique Approach:

If you don't save money, we don't get paid.

We focus like a laser on one purpose: to save you money – lots of money.

We start from zero and take your ISP operational as a facilities based CLEC in six months. We do most of the work.

We receive nearly all of our payment after you are saving money and only at 50% of your savings until we are paid in full.

Myth: It takes hundreds of thousands of dollars to become a facilities based CLEC.

Myth: One must have high priced Telecommunications Lawyers, Consultants, and Staff to start and operate a CLEC.

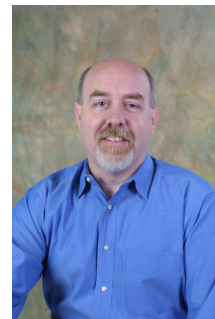

Myth: It takes two years minimum to become operational as a CLEC.

Myth: You can save just about as much as a customer of a CLEC as being one.
